## INTRODUCTION TO COLLEGE

Lyallpur Khalsa College, Jalandhar, the premier historical educational institution of Northern India, awarded with Potential For Excellence by UGC in 2016, is ranked among the top institutions of country. The college has been granted various reputed grants from govt of india like : DST-FIST and DBT STAR COLLEGE GRANT. The genesis of this great institution dedicated to selfless-service of humanity dates back to 1908, when it was established first as Khalsa School at Lyallpur (now known as Faislabad in Pakistan) and later developed into a college in 1926. After its reestablishment in Jalandhar in 1948 following the partition of the country, the college has established itself as a leader in the field of higher education. Currently, it is imparting quality education to more than 7500 students including over 3000 girls.

## P.G. DEPARTMENT OF BIOTECHNOLOGY

The Post Graduate Department of Biotechnology, Lyallpur Khalsa College, Jalandhar is one of the pioneer departments in the northern region who have started biotechnology in 2001. Department offers both M.Sc. and B. Sc. Biotechnology program at academic level. The curriculum is duly balanced with exhaustive training and research exposure in house and at National and International entities working on similar lines in biotech research. The department routinely organizes various activities such as:

- \* Sponsored Seminars by Eminent Scientists.
- \* Workshops
- \* DBT sponsored popular lecture series.
- \* DST- INSPIRE Science Internship Camp.

In addition, during previous years, department has organized various conferences and workshops at National level being sponsored by UGC and DBT. Further, faculty members of Biotechnology department have been sanctioned various major/minor research projects from DST, govt. of India and UGC. Department has achieved a rear distinction of being awarded a DST-FIST and DBT-STAR grant for upliftment and development of infrastructures and labs. Department has DST-FIST sponsored Bioinformatics lab for students for advanced research in Biotechnology/Bioinformatics. Biotechnology and Bioinformatics provide a cross-disciplinary education for the next generation of industry leaders and entrepreneurs.

## ABOUT BIODIVERSITY DAY

The International Day for Biological Diversity is a United Nations sanctioned international day for the promotion of biodiversity issues. From its creation by the Second Committee of the UN General Assembly in 1993 until 2000, it was held on December 29 to celebrate the day. The United Nations proclaimed May 22 as the International Day for Biological Diversity (IDB) to increase understanding and awareness of biodiversity issues. 2019's theme for the International Day for Biological Diversity is "Our Biodiversity, Our Food, Our Health", which aims to leverage knowledge and spread awareness of the dependency of our food systems, nutrition, and health on biodiversity and healthy ecosystems. To feed more than 7 billion today and the 10 billion people in 2050, conserving biodiversity is critical for our well being and the drive to end hunger and malnutrition. Health is our most basic human right. For most people, it does not just mean freedom from illness, but a state of overall social, emotional, physical, spiritual and cultural welfare. It is aimed to:

- \* Disseminate knowledge and information on conservation of biodiversity
- \* Infuse healthy ideas of equitable sharing of benefits arising from natural resources and sustainable use of biological diversity
